

Adaptive Reuse

The process of reusing an old building for a new purpose

- ### Characteristics of Good Adaptive Reuse
1. **Great Location;** placement in the right area for a specific consumer type makes all the difference
 2. **Character-Defining Features;** keeping features of the original buildings can influence interesting design and build character in the design
 3. **Original Materials;** picking and choosing your materials helps making a design that will be durable to time
 4. **Fleible Thinking;** leave the design open to satisfy many types of potential users
 5. **Respectful Upgrades;** keeping in mind future life and building economically and eco-friendly will bring a better design
 6. **Careful Site Planning;** taking considerations of how a space will work leads to a successful design
